

Improving PathMNIST Classification

Problem

- ~110k colorectal cancer histology image patches from PathMNIST¹
- 9 different tissue classes

Benchmark to Improve

Official MedMNIST PathMNIST results report up to 0.990 AUC and 0.911 ACC with ResNet-50 at 28x28 resolution.

Format 4 Strategy

Improve effectiveness by combining learning models and training strategies: augmentation, transfer learning, soft-voting ensembles, and cluster-aware specialists.
